

"Documento Riservato ai Cittadini Fondatori".

## **WHITE PAPER: Utopian Identity Coin (\$UIC)**

### **Version 1.0 – Genesis Phase**

#### **1. VISION AND MISSION**

Utopian Identity City is not merely a digital platform; it is a sovereign artistic nation built on creative freedom and individual identity. The \$UIC Token serves as the economic cornerstone of this ecosystem, enabling citizens to own, trade, and invest in the aesthetic and cultural value of the city.

## **2. THE HYBRID ECONOMY (Dual-Track Model)**

To ensure sustainable growth and global accessibility, Utopian Identity adopts a unique financial model:

- Civil Track (Fiat): Simplified access via Euro for residents on the Wix platform.
- Sovereign Track (Blockchain): A real digital asset on the Polygon network, globally tradable, ensuring liquidity and transparency for investors.

## **3. TOKENOMICS**

- Token Name: Utopian Identity Coin
- Ticker: \$UIC
- Network: Polygon (Layer 2)
- Total Supply: 10,000,000 \$UIC (Fixed / Non-Mintable)
- Genesis Price: € 0.01

## **Token Allocation:**

- 40% Bank Reserve: Coverage for "Civil Track" citizen conversions.
- 30% Ecosystem Development: District construction and artist compensation.
- 20% Public Sale: Liquidity for the open market.
- 10% Founder Fund: Founder's share (Subject to a 12-month vesting period).

## **4. DEFLATIONARY MODEL AND UTILITY**

The value of \$UIC is protected by a Burning mechanism: a percentage of every internal transaction is permanently removed from circulation, reducing supply and increasing rarity over time.

Token Utility:

- Acquisition of Land and Properties within the Districts.
- Access to Elite Events and Consultative Governance.
- Exchange of unique artworks within the "Identity" Marketplace.

## **5. GOVERNANCE: THE SOVEREIGN VISION**

Unlike chaotic decentralized models, Utopian Identity City follows the guidance of the Original Founder. Holding \$UIC grants economic rights, but the artistic and philosophical consistency of the nation is protected by the Founder's Veto Power, ensuring the brand is never compromised by speculative logic.

## **6. 2026 ROADMAP**

- March: Launch of the Genesis Phase and Passports.
- May: Smart Contract Minting and Private Sale.
- September: Blockchain Marketplace Integration and Exchange Listing.
